

# THE MEMPHIS DAILY APPEAL—SATURDAY, DECEMBER 10, 1859.

## Daily Appeal.

### WEIGHTS AND MEASURES.

A proposition will be submitted to Congress at its ensuing session, backed by the unanimous voice of the people of the Southern States, having for its object the establishment of a uniform system of weights and measures throughout the country. It is so happily embodied in our currency. In other words Congress will be asked to adopt a pound avoirdupois, for instance—and another of measures, which will be adopted, if that is deemed advisable—with divisions into tenths and hundredths, and corresponding measures or standards of time and distance, to supersede the present artificial and perplexing system of weights and measures, substantially like those of France.

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.

With names expressive or least indicative, of the extent expressed by each. So with weight the new scale would be after this:

10 grains, 1 scruple, 1 drachm, 1 fluid.

20 feet, 1 rod, 10 rods, 1 furlong.

160 pounds, 1 stone, 1 hundredweight.
